1. Secure Enterprise Search (SES) and Global Search
   - Global Application Search feature enables users to search across multiple, related components. Secure Enterprise Search (SES) provides a familiar user interface that searches on consumer internet sites and provides users with secure access to your organization's data sources such as FSCM modules and file attachments.

2. WorkCenters
   - WorkCenters use the PeopleTools WorkCenter Framework and Application WorkCenter Framework, which facilitates the configuration of the delivered pagelet content. WorkCenter pagelets help drive the transaction and work area for users to complete sets of tasks based on their functional area.
   - PeopleSoft FSCM 9.2 includes WorkCenters for these applications: Payables, Billing, Receivables, General Ledger, Supply and Demand, Project Costing, Staffing, Contracts (including Grants and Projects), Supplier Administration, and SRM Buyer Administration.

3. Approval Framework Improvements & Extensions – Workflow (AWE) improvements
   - Ability to add an ad-hoc approver during the approval cycle.
   - Ability to add comments and attachments to a transaction during the approval cycle.
   - Extend the approval framework to support Commitment Control Budget Journals.
   - Extend the approval framework to support specific Treasury and Asset Management flows.

4. Forms and Approval Builder
   - Forms and Approval Builder is designed to help organizations eliminate paper and email based forms, replacing them with audit able, electronically approvable, and immediately accessible forms and form data. This tool is a PeopleSoft common component and offers analysts the ability to specify an unlimited number of various field types to appear on a form; define instructions, attachments, and approval routing paths for forms; and map the form fields to PeopleSoft Component Interfaces so that the form can feed data into a PeopleSoft transaction.

5. Attachments – extend to the following areas:
   - Expenses
   - Receivables
   - eBill Payment
   - Payables
   - Asset Management
   - Treasury

6. Pivot Grids
   - Pivot Grids provide self-service, interactive, analytical grids and charts for users to segment and filter data.

7. Embedded Help
   - Detailed, embedded help is available for users when they select the information (question mark) icon available on group boxes, grids, or scroll areas on a page.

8. New PeopleSoft Online Help Solution
   - New help solution interface looks and functions much like a website rather than the book format structure for help documentation in the past.

9. Third-Party Hosted Credit Card Storage and Payment
   - New option to secure credit card information. The new approach to payment security enables a third-party host to handle collection, storage, and transmission of credit card data. This model is referred to as Third-Party Hosted Credit Card Storage and Payment and is available in PeopleSoft Order to
10. Financials Audit Trail for Supplier (Vendor) Changes
   o PeopleSoft Financials 9.2 extends the use of the audit trail to support the changes made to the supplier core data. Customers can configure the data elements that must be tracked in terms of changes. Customers can see the changes and who made them through the Financials Audit Trail online inquiry.

11. Online Supplier (Vendor) Registration & Collaboration
   o 9.2 supports Online Supplier Registration and Collaboration using the following capabilities, which are available to applications that use the Vendor (now renamed Supplier) core information:
     ✓ Self-service registration for new suppliers and new bidders
     ✓ Employee self-service supplier registration
     ✓ Manage supplier approvals
     ✓ Manage invitations
     ✓ Configurable Profile Questions

12. PeopleSoft Continuous Delivery Model
   o Deliver new capabilities and features on a continual basis – outside of major releases. They plan to do this in a manner that is less disruptive than an upgrade or reinstallation. PeopleSoft will accomplish this by delivering new features and capabilities within each calendar year between major releases.

13. PeopleSoft Interaction Hub
   o The PeopleSoft Applications Portal has been re-branded as the PeopleSoft Interaction Hub. PeopleSoft is offering an extended restricted use license of the PeopleSoft Interaction Hub, which is free with PeopleTools. This change extends the existing restricted use license to include these additional capabilities: Dynamic Unified Navigation and Site-Wide Branding.

14. Mobile Applications
   o PeopleSoft Mobile Approvals
   o PeopleSoft Mobile Expenses
   o PeopleSoft Mobile eProcurement

15. PeopleSoft iPad Certification
   o The PeopleTools certification on the Safari browser offers not only the ability to use dashboards and WorkCenters on your iPad, but you can do almost anything on your iPad that you can do on your desktop system. This exciting user interface platform has unlimited potential for enabling you to access your PeopleSoft application content from your mobile device.

16. Data Migration Workbench for Application Data
   o Introduces the Data Migration Workbench, which enables you to compare, validate, and copy application configuration data from one database to another using Application Data Sets (alternative to Data Mover)
     ✓ Allocations
     ✓ WorkCenters
     ✓ Accounting Rules

17. Value Add Integrations
- GL to Hyperion Planning/General Ledger
- Financials to Hyperion Financial Close Manager/General Ledger
- GL to Fusion Accounting Hub/General Ledger
- Projects to Primavera P6/Program Management, Project Costing
- Procure to Pay and Expenses to Oracle Governance, Risk & Compliance/Purchasing, Accounts Payable, Expenses
- Expenses to Oracle Imaging and Process Management (I/PM)/Expenses
